**p1.suma a doua numere pozitive**

```
{
var int a;
var int b;
read(a);
read(b);
test(a>0 && b>0) then
[ write(a+b) ]
else then
[write(a-b) ]
}
```

**p2.Concatenare 2 stringuri**

```
{
var string a;
var string b;
var string c;
read(a);
read(b);
c=string.concat(a,b)
write(c);
}
```

**p1err.**

```
{
var string a = "alin;
var char a = 'alin';
}
```

**p3. Maximul dintre n numere**

```
{
```

```
var int n = 10;

var int number;

var array[n] x;

var int maximum = 0;

do_steps(var int i, n)

[ read(number);

x[i] = number; ]

do_steps(var int i, n)

[ test(x[i] > maximum) then

[maximum = x[i]; ]

]

write(maximum);

}
```
